

## Erratum

The CSGB Research Report **05 (September 2011)** »*Dilation volumes of sets of bounded perimeter*« by M. Kiderlen and J. Rataj has been withdrawn. Theorem 4.3 and its consequences do not hold for all compact, at most countable structuring elements  $Q$ .

A corrected, updated and extended version of the paper is available as CSGB Research Report **08 (September 2017)** with the title »*Dilation volumes of sets of finite perimeter*«. Among others, the above mentioned result is shown here (in Theorem 1.1) to hold for all *finite* structuring elements  $Q$ .

M. Kiderlen
